

TLDR-IQ

TOO LONG; DIDN'T
READ

**Fast Answers.
Less Noise. More Clarity**

TLDR-IQ delivers personalized, AI-generated briefings from internal and external data sources, cutting through clutter to bring only what matters —when and where you need it. From inbox to Slack, it keeps your team aligned, informed, and ready to act.

Key Features

Personalized AI-Powered Summaries

Delivers AI-generated, personalized content digests from private or public sources

Auto-Generated Briefings & Presentations

Automatically builds and delivers presentations or briefs on a set schedule

Rapid Insight Extraction

Reduces time spent on research by synthesizing large volumes of data into key takeaways

Interactive Knowledge Exploration

Allows users to ask follow-up questions via Q&A for deeper insights

Delivered Where You Work

Integrates seamlessly with email, Slack, or Teams for effortless access

Unique Value Proposition

Get to the Point—Faster Than Ever

Turn overwhelming data into smart, digestible summaries tailored to your role and interests

Works with Your Data, Your Sources

Combine internal and external documents—RFPs, reports, policies, market intel—into one intelligent feed

Zero Setup Burden on Your Team

Fully managed service: IgnitelQ handles data collection, curation, and enrichment

Always On. Always Relevant

Receive the most up-to-date, contextual insights when and where you need them

Comprehension that Drives Action

Move from reading to doing—TLDR-IQ enables faster decisions with less mental overhead

Benefits & Outcomes

Reduces research and reading time dramatically, improving daily productivity

Delivers only what's relevant—boosting focus and reducing cognitive load

Improves alignment across teams by distributing consistent, up-to-date intel

Empowers faster decisions with AI-enriched summaries and context

Frees up employee time to act on insights rather than gather them
